INTRODUCTION

Grant Agreement Preparation Forms (GPF's) have been designed to facilitate the project negotiations and the production of the grant agreement. It is a main communication instruments between the co-ordinator representing the Consortium and the Commission's Project Officer. Essentially the forms are used to identify the beneficiaries that will sign/accede to the grant agreement, to determine the eligible costs and Community contribution and to electronically capture structured information on work packages, efforts, milestones and deliverables. The forms also include a standard declaration to be signed by each participating organisation.

To assist the filling in of the GPF's the following is made available:

- Annotations – these are attached to the standard forms and should be read carefully
- Pre-filled legal information (see below)
- NEF – NEF is an online tool to be used by the co-ordinator and the beneficiaries to edit the content of the GPF's

Legal information is held in the A2.1 form. This information is pre-filled by the Commission services using either information taken from the Commission database or from the proposal. Depending on the validity of this information, the organisation concerned may have to supply to the Commission with a so called "identification fiche" and supporting legal documents. For instructions on this, see the annotations to the A2.1 form.

The budget table (A3.2) is to be used in Part A of Annex I of the grant agreement.

GENERAL INFORMATION

Project title ³	Design of a pan-European Infrastructure for Large Apparatus studying Grand Unification and Neutrino Astrophysics		
Starting date ⁴	The first day of the month after the signature by the Commission		
Duration in months ⁵	24		
Call (part) identifier ⁶	FP7-INFRASTRUCTURES-2007-1		
Activity code(s) most relevant to your topic ⁷	INFRA-2007-2.1-01: Design studies for research infrastructures in all S&T fields		
Free keywords ⁸	underground science, particle and astro-particle physics, fundamental particle properties		

Abstract ⁹ (max. 2000 char.)

Key questions in particle and astroparticle physics can be answered only by construction of new giant underground observatories to search for rare events and to study sources of terrestrial and extra-terrestrial neutrinos. In this context, the European Astroparticle Roadmap of 03/07, via ApPEC and ASPERA, states: "We recommend a new large European infrastructure, an international multi-purpose facility of 105-106 ton scale for improved studies of proton decay and low-energy neutrinos. Water-Cherenkov, Liq. Scintillator & Liq. Argon should be evaluated as a common design study together with the underground infrastructure and eventual detection of accelerator neutrino beams. This study should take into account worldwide efforts and converge by 2010..." Furthermore, the latest particle physics roadmap from CERN of 11/06 states: "A range of very important non-accelerator experiments takes place at the overlap of particle and astroparticle physics exploring otherwise inaccessible phenomena; Council will seek with ApPEC a coordinated strategy in these areas of mutual interest." Reacting to this, uniting scientists across Europe, we propose here a design study, LAGUNA, to produce by 2010 a full conceptual design sufficient to provide policy makers and funding agencies with enough information for a construction decision. Has Europe the technical and human capability to lead future underground science by hosting the next generation underground neutrino and rare event observatory? We aim to answer this question. Certainly construction will exceed the capacity of any single European nation - to compete with the US and Asia unification of our scattered efforts is essential. Failure to plan now risks not only that our picture of Nature's laws remain fundamentally incomplete but also that leadership in the field enjoyed by Europe for 20 years falls away. EU FP7 input now is timely and will have major strategic impact, guaranteeing coherence and stimulating national funding.

32. SME

SME means micro, small and medium sized enterprise within the meaning of Recommendation 2003/361/EC in the version of 6 May 2003 (see http://ec.europa.eu/enterprise/enterprise_policy/sme_definition/index_en.htm).

An enterprise is considered as an SME, taking into account its partner enterprises and/or linked enterprises (please see the above mentioned recommendation for an explanation of these notions and their impact on the definition), if it:

- employs fewer than 250 persons
- has an annual turnover not exceeding EUR 50 million, and/or
- an annual balance sheet total not exceeding EUR 43 million
- is autonomous

The headcount corresponds to the number of annual work units (AWU), i.e. the number of persons who worked full-time within the enterprise in question or on its behalf during the entire reference year under consideration. The work of persons who have not worked the full year, the work of those who have worked part-time, regardless of duration, and the work of seasonal workers are counted as fractions of AWU. The staff consists of:

- employees;
- persons working for the enterprise being subordinated to it and deemed to be employees under national law;
- owner-managers;
- is autonomous

partners engaging in a regular activity in the enterprise and benefiting from financial advantages from the enterprise.

ATTENTION: Apprentices or students engaged in vocational training with an apprenticeship or vocational training contract can not be included as staff. The duration of maternity or parental leaves is also not counted.

The data to apply to the financial amounts (e.g. turnover and balance sheet), as well as to the headcount of staff, are those relating to the latest approved accounting period and calculated on an annual basis. They are taken into account from the date of closure of the accounts. The amount selected for the turnover is calculated excluding value added tax (VAT) and other indirect taxes.

In the case of newly-established enterprises whose accounts have not yet been approved, the data to apply is to be derived from a bona fide estimate made in the course of the financial year. These organisations must insert "N/A" for the two questions relating to the duration and the closing date of their last approved accounting period.

An enterprise that is not an SME.

40. Funding % for RTD/Innovation activities

For research and technological development activities, the Community financial contribution may reach a maximum of 50% of the total eligible costs.

However, for beneficiaries that are non-profit public bodies, secondary and higher education establishments, research organisations and SMEs, the rate may reach a maximum of 75% of the total eligible costs. If these beneficiaries change their status during the life of the project, this reimbursement rate shall be applicable up to the moment they lose their status.

41. Indirect costs

Indirect costs are all those eligible costs which cannot be identified by the beneficiary as being directly attributed to the project, but which can be identified and justified by its accounting system as being incurred in direct relationship with the eligible direct costs attributed to the project. They may not include any eligible costs.

42. Actual indirect costs

Beneficiaries who have an analytical accounting system to identify their indirect costs are allowed to claim actual indirect costs.

43. Simplified method

If it is in accordance with its usual accounting and management principles and practices, a beneficiary is allowed to use a simplified method of calculation of its full indirect eligible cost at the level of its legal entity. Use of such a method is only acceptable where the lack of analytical accounting or the legal requirement to use a form of cash-based accounting prevents detailed cost allocation. The simplified approach must be based on actual costs derived from the financial accounts of the period in question.

44. Standard flat rate

A beneficiary may opt for a flat rate of 20% of its total eligible costs excluding the costs for subcontracting and the costs of reimbursement of resources made available by third parties that are not used on the premises of the beneficiary

45. Special transitional flat rate

Non-profit public bodies, secondary and higher education establishments, and research organisations and SMEs, which are – due to the lack of analytical accounting – unable to identify with certainty their real indirect costs for the project, when participating in funding schemes which include research and technological development and demonstration activities, as referred to in the table of Article II.16 of the grant agreement, may opt for a flat-rate of 60% of the total direct eligible costs excluding costs for subcontracting and the costs of reimbursement of resources made available by third parties which are not used on the premises of the beneficiary. If these beneficiaries change their status during the life of the project, this flat rate shall be applicable up to the moment they lose their status.

46. ICPC

If you are participating from an International Cooperation Partner Country (ICPC), you can opt for lump sum funding instead of reimbursement of eligible costs.

47. Funding % for Coordination/Support activities

The Community financial contribution may reach a maximum of 100% of the total eligible costs.

48. Maximum reimbursement of indirect costs

In the case of coordination and support actions, reimbursement of indirect eligible costs for every beneficiary may reach a maximum of 7% of the direct eligible costs, excluding the direct eligible costs for subcontracting and the costs of reimbursement of resources made available by third parties which are not used on the premises of the beneficiary.

49. Funding % for RTD

For research and technological development activities, the Community financial contribution may reach a maximum of 50% of the total eligible costs.

However, for beneficiaries that are non-profit public bodies, secondary and higher education establishments, research organisations and SMEs, the rate may reach a maximum of 75% of the total eligible costs. If these beneficiaries change their status during the life of the project, this reimbursement rate shall be applicable up to the moment they lose their status.

50. Account name
