

The Minister Pedro Duque in the Committee on Science, Innovation and Universities of the Congress of Deputies to report on the general lines of his Department.

February 20th, 2020

<https://www.youtube.com/watch?v=2o1RtsvVAzE>

starting around minute 28:30

.....
Another line of action is the participation in the two new major neutrino physics infrastructures, one projected in the United States and the other in Japan.

The first project, called DUNE, is led by FERMILAB and CERN and Spain will actively participate through the latter body of which it is a member.

On the other hand, the conversations have begun so that we can also **participate in the Japanese project called Hyper-Kamiokande** and led by Nobel Prize T. Kajita (I have said it well, man). Professor Kajita was the other day in our office explaining us the project. **Our goal is to obtain a good scientific return of this project but also an industrial return**
