

Interest of Spanish Groups in Hyper-Kamiokande

L. Labarga (UAM) [Spanish IBR representative]

Spain and the Japanese neutrino program: with neutrino beams:

- Kamiokande, ~ 1983 → 1996
- Super-Kamiokande, ~1996 →
 - *Vs are massive,*
 - *search for p- decay*
 - *search for SN relic neutrino SuperK-Gd*

UAM joins in 2008
- next: Hyper-Kamiokande, ~ 2026 →
 - *Origin of ν mass, anti-/matter asymmetry*
 - *ν astrophysics: Supernovae, DSNB, others*
 - *proton decay, Grand Unification*

UAM since beginning
- ✓ Strong contribution from Canfranc U. Laboratory
- ✓ Possibility to increase participation in future:
 - DIPF (San Sebastián) “confirmed”
 - USC (S. Compostela), IFAE (Barcelona), ...? “maybe”

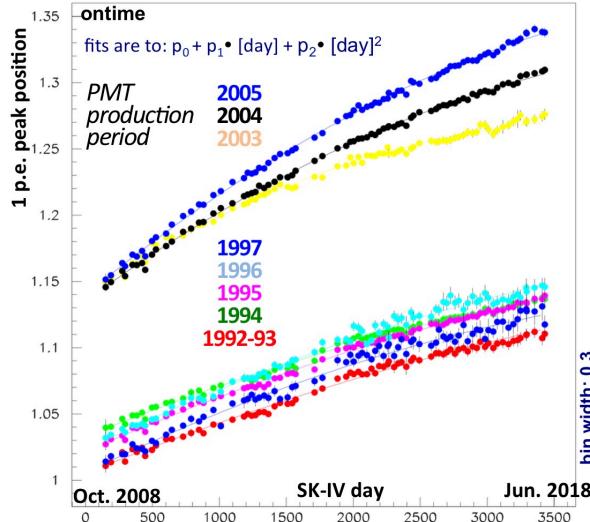

Spain & Super-Kamiokande: since 2008

funding mostly from EU, UAM, Japan

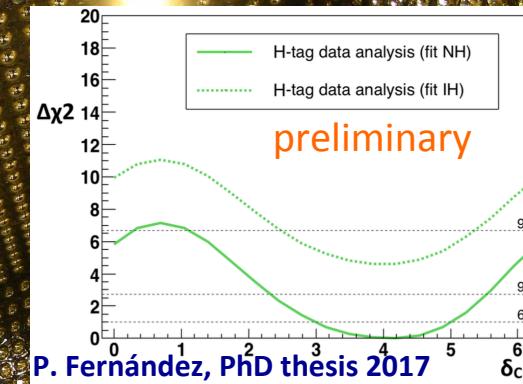

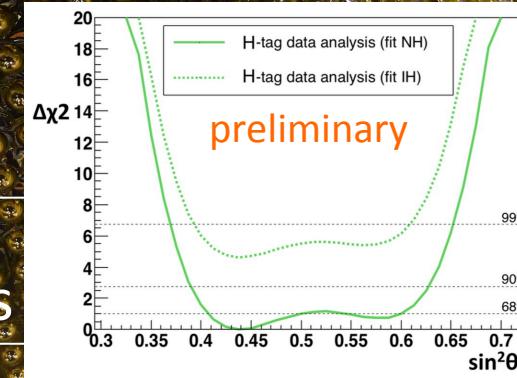

calibrations,
detector evolution, etc.

PMT-gain variation with time at different PMT groups
Nickel SK-IV data: gain [fitted 1 p.e. peak] vs. time

neutron-tag in
oscillation analyses

P. Fernández, PhD thesis 2017

Radio-purity campaign at Spanish
Canfranc Underground Laboratory for SuperK-Gd

The HPGe farm at LSC

J. Pérez, PhD thesis 2017

Excellent $\text{Gd}_2(\text{SO}_4)_3$ achieved, within specifications within experimental limits; Now preparing for mass production screening.

Name of Samples analyzed
(Material-date-Company-lot)
*GSF-Gd₂(SO₄)₃, GOX-Gd₂O

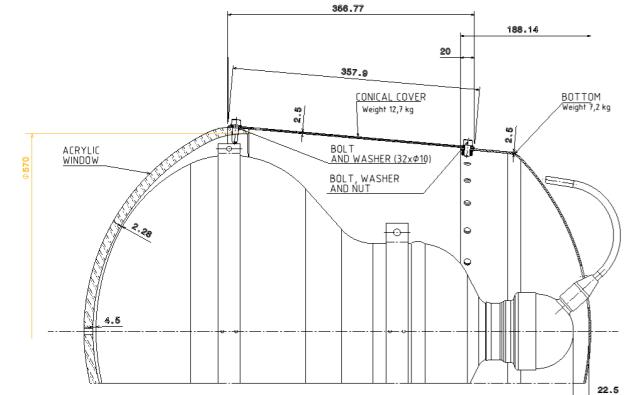

Current activities of Spain in Hyper-Kamiokande

funding from EU, UAM, Japan

- Relatively large UAM contribution to project proposal just approved
- working on simpler/cheaper approach to **anti-implosion covers for the PMTs**
- Already V1, V2 designed, prototypes made in Spain; tested in Spain & Japan

→ go to V3, it implies as well acrylic window modification

Potential Action Items for Spain in Hyper-Kamiokande

- short-medium term:
 - ✓ to **continue our R&D on low cost PMT cover** (*T. Aratz ...*)
 - now: iterations to optimize flangeless acrylic dome designs, fabricated in Japan and/or Italy (*Kuraray Tr. Co., Evonik ...*).
 - summer 19: 3rd testing campaign (V3) in Spain and Japan
 - Near future: refinement of flangeless, lower-weight and lower-complexity stainless steel cover body
 - ✓ **radio-purity screening** campaigns at **Canfranc Underground Laboratory**, LSC (large experience with SK-Gd)
 - ✓ R&D on **attachment system PMT-Cover-Structure**
 - ✓ Exploring **low-radioactivity glass providers** in Europe, through Spanish glass-makers and screening facilities in the LSC. Option to build the PMT bulbs too?
- mass production; in all cases is **XY000** items (maximum ~40000):
 - ✓ anti-implosion cover for PMT
 - ✓ ancillary mechanical parts for PMT-Cover-Structure
 - ✓ DAQ etc. electronic boards (for the time being only production)
